ECO-SOCIAL DEVELOPMENT ORGANIZATION (ESDO)

1. BACKGROUND

Eco-Social Development Organization (ESDO) has started its journey in 1988 with a noble vision to stand in solidarity with the poor and marginalized people. Being a peoples' centered organization, we envisioned for a society which will be free from inequality and injustice, a society where no child will cry from hunger and no life will be ruined by poverty. Over the last thirty years of relentless efforts to make this happen, we have embraced new grounds and opened up new horizons to facilitate the disadvantaged and vulnerable people to bring meaningful and lasting changes in their lives. During this long span, we have adapted with the changing situation and provided the most time-bound effective services especially to the poor and disadvantaged people. Taking into account the government development policies, we are currently implementing a considerable number of projects and programs including micro-finance program through a community focused and people centered approach to accomplish government's development agenda and Sustainable Development Goals (SDGs) of the UN as a whole. ESDO is one of the most dynamic organizations expanding its development interventions across 283 upazilas under 49 districts of Bangladesh covering over 9.5 million poor and vulnerable people.

The Member Secretary of the EC designated as Executive Director (ED) oversees the programs and activities and provides require guidance to the staff members to carry out the day-to-day activities in order to achieve individual program objectives as well as to accomplish ESDO's mission and vision as a whole. The Executive Director monitor the program implementation, outcomes and issues through organization's established result based Monitoring, Evaluation and Learning (MEL) system, meetings with different levels of staff and direct visiting programme participants at fields. The progress of project implementation, outcomes and the issues emerged in the previous year are reported and discussed at Executive Committee Meeting. The EC makes decisions and provide future strategic directions to ED. The ED implements the decisions and directions of EC meeting at organization and field level through his staff. Thus a two way decision making and governing process (bottom to up and up to bottom) are maintained in the organization. We organize Annual General Meeting (AGM) in each financial year, where all the members of General Governing Body, Executive Committee, and key staff members attend the meeting. All the achievements, outcomes, and emerged issues of the previous year and the decisions made at the EC meeting are presented, discussed and reviewed by the AGM participants and finally approved by the GC members. Yearly budget is also reviewed at AGM and the budget for next year is approved in the AGM. Thus a governance accountability of the organization is ensured.

8. TARGET GROUP:

We work with poor, marginalized, and disadvantaged groups and communities, especially with women, children, ethnic minorities and char & slum dwellers as our primary target group in order to improve their livelihoods. We also keen to work with organized communities seeking assistance to uplift themselves in a sustainable manner. We strongly believe in the ability of people and communities to identify their needs and drive their own development agenda. So, we facilitate individuals and communities to develop their capacity to access information, technologies, and resources in order to ensure sustainable livelihood improvement through their own efforts. We raise funds from a number of different donors and government to implement projects and programs to reach out the target people and communities with our quality services. We identify our target area, people, and communities according to individual project goals and objectives using valid systematic methods and empirical evidence. Taking in to account the individual project provisions, we deliver our services and interventions including micro-finance according to needs of the community through noble approaches.

9. THEORY OF CHANGE:

We believe that systemic and enduring change is possible when communities are able to initiate and drive their own development agenda. If their capacity is built they can bring changes in systems to access basic rights and services through working with government and other actors as well as harness and grow their own resources. We therefore, invest in capacity building to enhance community-led initiatives to create a firm basis for sustainable development and social justice.
